DETAILED ACTION

In response to an Amendment received on January 15, 2004. This action is non-final.

Claims 36-62 are pending in this application. Claims 36, 58 and 61-62 are independent claims.

The present title of the invention is "Rendering Non-Interactive Three-Dimensional Content".

The Group Art Unit of the Examiner case is now 2676. Please use the proper Art Unit number to help us serve you better.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 36-57 and 61, drawn to applying and comparing multiple optimizations on three-dimensional content, classified in class 345, subclass 419.

II. Claims 58-60 and 62, drawn to bandwidth tuning unit couple to optimization unit for output at a specific bandwidth, classified in class 345, subclass 501.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as method of applying and comparing multiple optimizations on three-dimensional content. Invention II has separate utility such as modifying for output at a specified bandwidth. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2676

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
